Good Morning All:

Can you refresh my memory? Have we had the CHP from Weston validate any previous soil data for NFB and HTC?

This data set has yet to be validated. If you don't have a need for the validation for the March 2016 soil samples than there is no need to bring in this support. Please let me know how you would like to proceed.

Hi Pete and Tim. Did we have the Weston HP validate this data in the past? I thought My only request for HP was getting cost estimates for T&D

Regards,

Eric

Subject: Niagara Falls Boulevard Site - CHP Specialized Labor Support

Eric,
Per your request, RST 3 has procured the services of a Weston Certified Health Physicist (CHP) in support of the Removal Assessment being conducted at the Niagara Falls Boulevard Site under TDD No. TO-0007-0011. The CHP support is being brought in to validate the radiological parameter analytical results for the soil and rinsate blank data collected in March 2016 as part of the Removal Assessment of the Site which were submitted to the RST 3-procured laboratory (Pace Analytical). The following samples will be validated by the Weston CHP:

118 Soil
3 Rinsate Blanks
121 Total

The validation of these samples has been delayed due to the priority being placed on completing the CRU radiological validation first. It is estimated that 303 hours will be needed to complete the validation. The detailed cost breakdown associated with this specialized labor request can be found in the attached document. **The total cost for the CHP support for the Niagara Falls Boulevard Site is \$33,330.00.**

Please concur to this email if you are in agreement and then I will forward the necessary paperwork over to the Contracting Officer. If you have any questions or comments please let me know.

Thanks,

Timothy Benton, CHMM
